

PRICE LIST

valid from 1.2.2022

Initial consultation and examination	PRICE
Initial online consultation anamnesis and evaluation of provided results, explanation of sterility treatment options in the length of 30 min	FREE
Initial personal consultation (entrance examination price will be deducted from the therapy cost) consultation with a doctor, anamnesis, basic gynaecological examination including ultrasound scan, plan of necessary examinations and explanation of sterility treatment options <u>does not include:</u> cervix examination (oncocytology), blood samples, sperm analysis	150 €
Ultrasound scan examination (if not included within therapy package) gynaecological ultrasound scan examination, further treatment plan, report	80 €
Sperm analysis (if not included within therapy package) basic examination according to WHO recommendations	80 €
Personal consultation with a doctor upon request consultation without gynaecological or laboratory examination in the length of 15 min	50 €
Online consultation with a doctor (telephone / Skype / MS Teams) upon request consultation and treatment recommendations based on additional results in the length of 15 mins	40 €

THErapy USING OWN GENETIC CELLS

IVF packages using your own genetic cells	PRICE
<p>NeoLife</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of the stimulation plan ▪ all ultrasound scan examinations during stimulation ▪ STD of a couple according to the valid legislation ▪ Sperm analysis (SPG) and its preparation ▪ Follicle(s) retrieval under general anaesthesia ▪ fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation ▪ ECHO catheter during transfer ▪ embryo transfer ▪ assisted hatching by laser <p>does not include: stimulant medication and embryo(s) cryopreservation</p>	2790 €
<p>in case of cycle resulting without embryo transfer</p> <p>includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer</p>	2200 €
<p>in case of cycle termination after follicle(s) retrieval</p> <p>includes all procedures above to the follicle(s) collection incl., but there is no mature egg to fertilize</p>	1200 €
<p>in case of cycle termination before the follicle(s) retrieval</p> <p>no response to stimulant medication</p>	400 €

<p>NeoLife+</p> <p>includes all listed from the NeoLife package above and furthermore:</p> <ul style="list-style-type: none"> ▪ use of the sperm pre-selection method for fertilization according to the embryologist ▪ a dividing spindle visualization with a polarizing microscope during fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation in the Embryoscope+ time-lapse system ▪ embryo transfer including EmbryoGlue medium <p>does not include: stimulant medication and embryo(s) cryopreservation</p>	3690 €
<p>in case of cycle resulting without embryo transfer</p> <p>includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer</p>	2600 €
<p>in case of cycle termination after follicle(s) retrieval</p> <p>includes all procedures above to the follicle(s) collection incl., but there is no mature egg to fertilize</p>	1400 €
<p>in case of cycle termination before the follicle(s) retrieval</p> <p>no response to stimulant medication</p>	400 €

Sperm cryopreservation	PRICE
------------------------	-------

Sperm cryopreservation (if not included within therapy package) sperm freezing (1-3 straws) including 1-year storage and STD according to the valid legislation	230 €
--	--------------

Oocytes cryopreservation (social freezing)	PRICE
--	-------

Social freezing <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of the stimulation plan ▪ necessary hormonal tests, including AMH ▪ STD according to the valid legislation ▪ all ultrasound scan examinations during stimulation ▪ follicle(s) retrieval under general anaesthesia ▪ cryopreservation of all mature oocytes (2-3 oocytes in 1 straw) ▪ 1 year storage Does not include: stimulant medication	1690 €
in case there are no oocytes for cryopreservation	1350 €
in case of cycle termination before the follicle(s) retrieval	400 €
Completion of the cycle after social freezing <ul style="list-style-type: none"> ▪ consultation with a couple and embryo transfer preparation plan ▪ necessary hormonal tests for a female patient ▪ STD according to the valid legislation ▪ Sperm analysis (SPG) for a male partner ▪ ultrasound scan examination during therapy preparation ▪ oocytes thawing process ▪ oocytes fertilization by ICSI method ▪ prolonged cultivation in the Embryoscope+ time-lapse system ▪ assisted hatching by laser ▪ ECHO catheter during transfer ▪ embryo transfer does not include: medication during preparation and embryo cryopreservation	1490 €
in case of cycle resulting without embryo transfer includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer	1050 €
in case of cycle termination after follicle(s) retrieval includes all procedures above to the follicle(s) collection incl., but there is no mature egg to fertilize	850 €

Embryo cryopreservation	PRICE
-------------------------	-------

Embryo cryopreservation cryopreservation of suitable embryos by vitrification, always 1 embryo in 1 straw, including 1-year storage	
1 straw	250 €
2 and more straws (flat-rate payment)	400 €

Cryo-embryo transfer	PRICE
----------------------	-------

Cryo-embryo transfer	PRICE
<ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ therapy plan preparation ▪ all ultrasound scan examinations during therapy preparation ▪ embryo thawing process ▪ assisted hatching by laser ▪ ECHO catheter during transfer ▪ embryo transfer <p><u>does not include:</u> medication during preparation it is possible to use EmbryoGlue medium for an additional cost of 200€</p>	950 €

in the case of procedure performance on weekends or holidays, at the patient's request, a surcharge of 800€ applies in addition to the therapy cost

THERAPY USING DONATED GENETIC CELLS

IVF packages using donated genetic cells	PRICE
<p>Grateful Life</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of a treatment plan ▪ STD of male partner according to the valid legislation ▪ Sperm analysis (SPG) and its preparation ▪ male partner sperm cryopreservation for donated oocytes fertilisation ▪ necessary hormonal tests of female recipient ▪ blood group examination of both partners ▪ ultrasound scan examinations of the female recipient during embryo transfer preparation ▪ donor compensation (donor selection according to recipients phenotype and blood groups upon request) ▪ fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation ▪ cryopreservation of suitable embryos in the blastocyst stage including 1 year storage ▪ ECHO catheter during embryo transfer ▪ embryo transfer ▪ assisted hatching by laser ▪ guarantee of 2 good quality blastocysts <p>does not include: medication during female recipient preparation for embryo transfer</p>	<p>5790 €</p>
deposit before donor assignment	4000 €
non-refundable fee in case of therapy termination before fertilization of the donor's oocytes	600 €
2nd and following embryo transfer (incl. assisted hatching)	950 €
<p>Grateful Life+</p> <p>includes all listed from the Grateful Life package above and furthermore:</p> <ul style="list-style-type: none"> ▪ use of the sperm pre-selection method for fertilization according to the embryologist ▪ a dividing spindle visualization with a polarizing microscope during fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation in the Embryoscope+ time-lapse system ▪ embryo transfer including EmbryoGlue medium ▪ guarantee of 3 good quality blastocysts (instead guarantee of two blastocysts according to the Grateful Life package) <p>does not include: medication during female recipient preparation for embryo transfer</p>	<p>8690 €</p>
deposit before donor assignment	4000 €
non-refundable fee in case of therapy termination before fertilization of the donor's oocytes	600 €
2nd and following embryo transfer (incl. assisted hatching)	950 €

Grateful Life+ - full package for half price

when completing two Grateful Life+ therapies, we offer our patients **the Grateful Life+ package for a discounted price of 50% of the standard package price**

We offer Grateful Life + at a discounted price if the following conditions are met:

- the patient does not violate the treatment plan during therapy (medication use, documentation evidence of required results),
- sperm analysis within the the norm (the highest minor pathology),
- there is no recurrent low endometrium during embryo transfer preparation even at elevated doses of oestrogens,
- a pathology was not known before the treatment, which was pointed out by the centre's doctor and the patient rejected the proposed procedure (for cases of sactosalping, SM fibroids, etc.),
- Uterine pregnancy has never been achieved with a fetal heartbeat confirmation.

4350 €

IVF package using donated embryos

PRICE

Therapy with a donated embryo

- coordinator availability throughout the therapy during working hours
- preparation and consultation of a treatment plan
- necessary hormonal tests of the female recipient
- ultrasound scan examinations of the female recipient during embryo transfer preparation
- of one donated embryo from cryo-bank
(embryo from donated oocytes and donated sperm in the blastocyst stage, both donors examined according to currently valid legislation of gamete donors)

1990 €

- **ECHO catheter** during embryo transfer
- **embryo transfer**
- **assisted hatching** by laser

does not include: medication during female recipient preparation for embryo transfer

in the case of procedure performance on weekends or holidays, at the patient's request, a surcharge of 800€ applies in addition to the therapy cost

INDIVIDUAL METHODS AND ADDITIONAL SERVICES

Methods maximising therapy success (if not included in the therapy package price)	PRICE
ICSI method of all mature oocytes	440 €
Microfluid sperm sorting chips	350 €
MACS	350 €
Polarizing microscope – a dividing spindle observation system	350 €
Prolonged cultivation	150 €
Prolonged cultivation in the Embryoscope+ time-lapse system	450 €
Assisted hatching by laser	200 €
ECHO catheter	150 €
EmbryoGlue	200 €

Additional services	PRICE
Donated sperm thawing of 1 dose of donor sperm and its preparation for therapy (selection respecting the couple phenotype)	450 €
Annual storage of gametes extension of embryos / oocytes / sperm / testicular or epididymal tissue storage by 1 year	150 €
TESE/MESA/PESA testis/epididymis tissue collection under general anesthesia, sperm preparation, observation during post-operation rest	1700 €
in case of sperm retrieval, replenishment of the patient's STD according to the valid legislation, cryopreservation of the genetic material, its storage for 1 year	220 €
Diagnostic hysteroscopy procedure in the operating room without general anesthesia, operation without biopsy, observation during post-operation rest does not include: general anaesthesia	500 €
Surgical hysteroscopy procedure in the operating room without general anesthesia, biopsy according to the surgeon's indication, observation during post-operation rest does not include: general anaesthesia	650 €
histological examination of biopsied material	according to the specialised laboratory price list
Cyst puncture vaginal cyst puncture without general anaesthesia in the operating room, observation during post operation rest does not include: histological examination of the punctured material	250 €

Endometrial scratch endometrial disruption performed with a sterile pipelle or probe prior to embryo transfer	160 €
Cervical dilatation procedure under general anaesthesia, when the cervix is sterile dilated, observation during post – operation rest <u>does not include: general anaesthesia</u>	160 €
Preoperative examination patients are sent to a cooperating workplace or the possibly may arrange the examination by their own general practitioner	according to the cooperating workplace price list
Urological examination patients are sent to Urovize Clinic	according to the cooperating workplace price list
General anaesthesia (if not included in the therapy package) anaesthesia, the assistance of Department of Anaesthesiology and Resuscitation doctor, observation during post-operation rest	200 €
Entonox (Nitrous oxide) Flat rate payment per one procedure	30 €
A comprehensive examination of endometrial receptivity (EndomeTRIO) Consultation and preparation plan for examination, endometrial biopsy without anaesthesia, examination of biopsied material to determine the appropriate time of progestogen and other parameters during embryo transfer, interpretation of the result in case of necessary repeat of examination, according to the company examining the biopsy price list	1300 €

Laboratory examination	PRICE
AMH	30 €
TSH, fT4, aTPO, PRL, E2, P4, FSH, LH, hCG – per individual test	15 €
Blood group + Rh factor	20 €
vit. D	100 €
STD anti-HIV 1, 2, p24, HBsAg, anti-HBC, TPHA, RRR	100 €
Confirmation of STD results in case of positive STD examination and the need for confirmation in the National Reference Laboratory (according to valid legislation)	80–220 €
Preoperative blood examination blood count, liver and kidney functions, basic coagulation, ions	30 €
STI PCR DNA test Neisseria gonorrhoeae, Mycoplasma, Ureaplasma, Chlamydie trachomatis, Trichomonas	90 €

Genetic consultation and examination	PRICE
Genetic consultation initial consultation with a geneticist, anamnesis, examined parameters conclusion	220 €
Interpretation of genetic results and report	70 €
Karotype blood test of a set of chromosomes	280 €
CFTR blood test of a set of cystic fibrosis gene mutations	350 €
Thrombophilic mutations f. II and f.V blood test for Leiden and Protrombin mutation genes	90 €
Panda/ Carrier test genetic compatibility test of partners – detection of monogenic diseases	490 €/ per person
PGT-A prolonged cultivation in the Embryoscope+ time-lapse system, 24 chromosomes examination from cells biopsied from developing blastocysts by the NGS method, incl. biopsy	390 €/ per embryo
PGT-SR prolonged cultivation in the Embryoscope+ time-lapse system, cells examination biopsied from developing blastocysts in known familial chromosome aberration- translocation, incl. biopsy	490 €/ per embryo
PGT-M prolonged cultivation in the Embryoscope+ time-lapse system, cells examination biopsied from developing blastocysts in a known monogenic disease – karyomapping method, incl. biopsy	4390 €/ up to 5 embryos
each additional embryo to PGT-M	620 €
other specific genetic tests according to the geneticist indication	according to the cooperating workplace price list

Gynaecology	PRICE
-------------	-------

Cervical oncocytology	
Standard	50 €
LBC (liquid based cytology)	50 €
including HPV genotyping	90 €

Transport	PRICE
-----------	-------

Transport to FertilityPort Prague transport organization and genetic cells transport from another workplace in Prague, incl. annual storage	130 €
transport outside Prague within the Czech Republic, and from countries outside the Czech Republic	individual
Transport from FertilityPort Prague administration fee for embryos / sperm / oocytes transport to another tissue establishment	130 €

Other	PRICE
-------	-------

Medical records summary patient's medical file summary within 30 days in Czech language	25 €
patient's medical file summary including laboratory results* within 30 days, in foreign language (English, German or Italian) *some results may be provided in Czech language only	100 €
medical documentation copies (per A4 page)	1 €
Assigned coordinator consultation (20 min) The necessity to use a coordinator during sterility treatment beyond the consultations already used	25 €
