

PRICE LIST

valid from 1.9.2023

Initial consultation and examination	PRICE
Initial online consultation anamnesis and evaluation of provided results, explanation of sterility treatment options in the length of 30 min	FREE
Initial personal consultation (entrance examination price will be deducted from the therapy cost) consultation with a doctor, anamnesis, basic gynaecological examination including ultrasound scan, plan of necessary examinations and explanation of sterility treatment options <u>does not include:</u> cervix examination (oncocytology), blood samples, sperm analysis	150 €
Ultrasound scan examination (if not included within therapy package) gynaecological ultrasound scan examination, further treatment plan, report	80 €
Sperm analysis (if not included within therapy package) basic examination according to WHO recommendations	80 €
Personal consultation with a doctor upon request consultation without gynaecological or laboratory examination in the length of 15 min	50 €
Online consultation with a doctor (telephone / Skype / MS Teams) upon request consultation and treatment recommendations based on additional results in the length of 15 mins	40 €

THErapy USING OWN GENETIC CELLS

IVF packages using your own genetic cells	PRICE
<p>NeoLife</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of the stimulation plan ▪ all ultrasound scan examinations during stimulation ▪ STD of a couple according to the valid legislation ▪ Sperm analysis (SPG) and its preparation ▪ oocyte(s) retrieval under general anaesthesia ▪ fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation ▪ ECHO catheter during transfer ▪ embryo transfer* ▪ assisted hatching by laser <p>does not include: stimulant medication and embryo(s) cryopreservation</p>	2790 €
<p>in case of cycle resulting without embryo transfer</p> <p>includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)</p>	2200 €
<p>in case of cycle termination after oocyte(s) retrieval</p> <p>includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize</p>	1200 €
<p>in case of cycle termination before the oocyte(s) retrieval</p> <p>no response to stimulant medication</p>	450 €

*Embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

<p>NeoLife+</p> <p>includes all listed from the NeoLife package above and furthermore:</p> <ul style="list-style-type: none"> ▪ use of the sperm pre-selection method for fertilization according to the embryologist ▪ a dividing spindle visualization with a polarizing microscope during fertilization of all mature oocytes by the ICSI method ▪ prolonged cultivation in the Embryoscope+ time-lapse system ▪ embryo transfer* <p>does not include: stimulant medication and embryo(s) cryopreservation</p>	3490 €
<p>in case of cycle resulting without embryo transfer</p> <p>includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)</p>	2800 €
<p>in case of cycle termination after oocyte(s) retrieval</p> <p>includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize</p>	1400 €
<p>in case of cycle termination before the oocyte(s) retrieval</p> <p>no response to stimulant medication</p>	450 €

*Embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

Dual-stim therapy	PRICE
<p>Dual-stim therapy</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of stimulation plan ▪ all ultrasound examinations during stimulations ▪ STD of a couple according to the valid legislation ▪ Sperm analysis (SPG) and its preparation ▪ both oocyte retrievals under general anaesthesia ▪ a dividing spindle visualization with a polarizing microscope during fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation ▪ ECHO catheter during transfer ▪ one embryo transfer* ▪ assisted hatching by laser <p>does not include: stimulant medication and embryo(s) cryopreservation</p>	4500 €
<p>in case of cycle resulting without embryo transfer</p> <p>includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)</p>	4050 €
<p>in case of cycle termination after the second oocyte(s) retrieval</p> <p>includes all operations from above to the second oocyte(s) collection incl. but there is no mature egg for fertilization *embryo transfer guarantee does not apply in case of aneuploid embryos after PGT</p>	3600 €
<p>in case of cycle termination before the second oocyte(s) retrieval</p> <p>no reaction to stimulant medication</p>	2900 €
<p>in case of cycle termination after the first oocyte(s) retrieval</p> <p>includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize</p>	1200 €
<p>in case of cycle termination before the first oocyte(s) retrieval</p> <p>no reaction to stimulant medication</p>	400 €

*Embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

Oocytes cryopreservation (social freezing)	PRICE
<p>Social freezing</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of the stimulation plan ▪ necessary hormonal tests, including AMH ▪ STD according to the valid legislation ▪ all ultrasound scan examinations during stimulation ▪ oocyte(s) retrieval under general anaesthesia ▪ cryopreservation of all mature oocytes (2-3 oocytes in 1 straw) ▪ 1 year storage <p>does not include: stimulant medication</p>	1690 €
in case there are no oocytes for cryopreservation	1350 €
in case of cycle termination before the oocyte(s) retrieval	450 €
<p>Social freezing during Dual-Stimulation</p> <ul style="list-style-type: none"> ▪ new stimulation after first oocyte(s) retrieval in following 4-5 days ▪ includes all listed from the Social freezing package above <p>does not include: medication during preparation and embryo cryopreservation</p>	2800 €
in case there are no oocytes for cryopreservation after the second oocyte(s) retrieval	2460 €
<p>in case of cycle termination before the second oocyte(s) retrieval (i.e. includes all procedures above to the first oocyte(s) collection incl., but there is no reaction to stimulant medication)</p>	1550 €
<p>Completion of the cycle after social freezing</p> <ul style="list-style-type: none"> ▪ consultation with a couple and embryo transfer preparation plan ▪ necessary hormonal tests for a female patient ▪ STD of male partner according to the valid legislation ▪ Sperm analysis (SPG) for a male partner ▪ ultrasound scan examination during therapy preparation ▪ oocytes thawing process ▪ oocytes fertilization by ICSI method ▪ prolonged cultivation in the Embryoscope+ time-lapse system ▪ assisted hatching by laser ▪ ECHO catheter during transfer ▪ embryo transfer* <p>does not include: medication during preparation and embryo cryopreservation</p>	1490 €
<p>in case of cycle resulting without embryo transfer includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)</p>	1050 €
<p>in case of cycle termination without oocytes for fertilization includes all procedures above but there is no egg to be fertilized</p>	850 €

*Embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

Sperm cryopreservation	PRICE
------------------------	-------

Sperm cryopreservation (if not included within therapy package) sperm freezing (1-3 straws) including 1-year storage and STD according to the valid legislation	230 €
--	--------------

Embryo cryopreservation	PRICE
-------------------------	-------

Embryo cryopreservation cryopreservation of suitable embryos by vitrification, always 1 embryo in 1 straw, including 1-year storage	
1 straw	250 €
2 and more straws (flat-rate payment)	400 €

Cryo-embryo transfer	PRICE
----------------------	-------

Cryo-embryo transfer <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ therapy plan preparation ▪ all ultrasound scan examinations during therapy preparation ▪ embryo thawing process ▪ assisted hatching by laser ▪ ECHO catheter during transfer ▪ embryo transfer does not include: medication during preparation it is possible to use EmbryoGlue medium for an additional cost of 200€	950 €
---	--------------

in the case of procedure performance on weekends or holidays, at the patient's request, a surcharge of 800€ applies in addition to the therapy cost

THERAPY USING DONATED GENETIC CELLS

IVF packages using donated genetic cells	PRICE
<p>Grateful Life Basic</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of a treatment plan ▪ STD of male partner according to the valid legislation ▪ Sperm analysis (SPG) and its preparation ▪ male partner sperm cryopreservation for donated oocytes fertilisation ▪ necessary hormonal tests of the female recipient ▪ blood group examination of both partners ▪ ultrasound scan examinations of the female recipient during embryo transfer preparation ▪ donor compensation (donor selection according to recipients phenotype and blood groups upon request) ▪ fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation ▪ cryopreservation of suitable embryos in the blastocyst stage including 1 year storage ▪ ECHO catheter during embryo transfer ▪ embryo transfer ▪ guarantee of 1 good quality blastocyst** <p><u>does not include:</u> medication during female recipient preparation for embryo transfer</p>	<p>4790 €</p>
<p>Grateful Life</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of a treatment plan ▪ STD of male partner according to the valid legislation ▪ Sperm analysis (SPG) and its preparation ▪ male partner sperm cryopreservation for donated oocytes fertilisation ▪ necessary hormonal tests of female recipient ▪ blood group examination of both partners ▪ ultrasound scan examinations of the female recipient during embryo transfer preparation ▪ donor compensation (donor selection according to recipients phenotype and blood groups upon request) ▪ fertilization of all mature oocytes by ICSI method ▪ prolonged cultivation ▪ cryopreservation of suitable embryos in the blastocyst stage including 1 year storage ▪ ECHO catheter during embryo transfer ▪ embryo transfer ▪ assisted hatching by laser ▪ guarantee of 2 good quality blastocysts** ▪ 3rd cycle free of charge*** 	<p>5980 €</p>

<p>Grateful Life+ includes all listed from the Grateful Life package above and furthermore:</p> <ul style="list-style-type: none"> ▪ prolonged cultivation in the Embryoscope+ time-lapse system ▪ guarantee of 3 good quality blastocysts** (instead guarantee of two blastocysts according to the Grateful Life package) ▪ 3rd cycle free of charge*** <p>does not include: medication during female recipient preparation for embryo transfer</p>	<p>7980 €</p>
<p>does not include: medication during female recipient preparation for embryo transfer</p>	
<p>***3rd cycle free of charge When completing two Grateful Life or Grateful Life+ therapies, we offer our patients a Grateful Life Basic package free of charge, if the following conditions are met:</p> <ul style="list-style-type: none"> - the patient does not violate the treatment plan during therapy (medication use, documentation evidence of required results), - sperm analysis within the norm (the highest minor pathology), - there is no recurrent low endometrium during embryo transfer preparation even at elevated doses of oestrogens, - a pathology was not known before the treatment, which was pointed out by the centre's doctor and the patient rejected the proposed procedure (for cases of sactosalping, SM fibroids, etc.), <p>Uterine pregnancy has never been achieved with a fetal heartbeat confirmation.</p>	<p>0 €</p>

** blastocyst(s) guarantee does not apply in the case of grossly pathological sperm analysis and aneuploid embryos after PGT

IVF package using donated embryos	PRICE
-----------------------------------	-------

<p>Therapy with one donated embryo</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of a treatment plan ▪ necessary hormonal tests of the female recipient ▪ ultrasound scan examinations of the female recipient during embryo transfer preparation ▪ of one donated embryo from a cryo-bank (embryo from donated oocytes and donated sperm in the blastocyst stage, both donors examined according to currently valid legislation of gamete donors) ▪ ECHO catheter during embryo transfer ▪ embryo transfer ▪ assisted hatching by laser <p>does not include: medication during female recipient preparation for embryo transfer</p>	<p>1990 €</p>
<p>Therapy with two donated embryos</p> <p>represents the transfer of one embryo followed by a 2nd transfer in case of a failed pregnancy</p> <ul style="list-style-type: none"> ▪ coordinator availability throughout the therapy during working hours ▪ preparation and consultation of a treatment plan ▪ necessary hormonal tests of the female recipient ▪ ultrasound scan examinations of the female recipient during embryo transfer preparation ▪ of one donated embryo from a cryo-bank (embryo from donated oocytes and donated sperm in the blastocyst stage, both donors examined according to currently valid legislation of gamete donors) ▪ ECHO catheter during 1st embryo transfer ▪ 1st embryo transfer including assisted hatching by laser <p>does not include: medication during preparation for transfers and 2nd embryo transfer (according to the valid price list)</p> <p>We offer the therapy with two donated embryos at a discounted price if the following conditions are met:</p> <ul style="list-style-type: none"> - the patient does not violate the treatment plan during therapy (medication use, documentation evidence of required results), - there is no recurrent low endometrium during embryo transfer preparation even at elevated doses of oestrogens, - a pathology was not known before the treatment, which was pointed out by the center's doctor and the patient rejected the proposed procedure (for cases of sactosalping, SM fibroids, etc.), - uterine pregnancy has never been achieved with a fetal heartbeat confirmation - embryos from the same donors are not guaranteed 	<p>2500 €</p>

in the case of procedure performance on weekends or holidays, at the patient's request, a surcharge of 800€ applies in addition to the therapy cost

INDIVIDUAL METHODS AND ADDITIONAL SERVICES

Methods maximising therapy success (if not included in the therapy package price)	PRICE
ICSI method of all mature oocytes	440 €
Microfluid sperm sorting chips	350 €
MACS	350 €
Polarizing microscope – a dividing spindle observation system	350 €
Prolonged cultivation	150 €
Prolonged cultivation in the Embryoscope+ time-lapse system	450 €
Assisted hatching by laser	200 €
ECHO catheter	150 €
EmbryoGlue	200 €

Additional services and other examinations	PRICE
Donated sperm thawing of 1 dose of donor sperm and its preparation for therapy (selection respecting the couple phenotype)	450 €
Annual storage of gametes extension of embryos / oocytes / sperm / testicular or epididymal tissue storage by 1 year	150 €
TESE/MESA/PESA testis/epididymis tissue collection under general anesthesia, sperm preparation, observation during post-operation rest	1700 €
in case of sperm retrieval, replenishment of the patient's STD according to the valid legislation, cryopreservation of the genetic material, its storage for 1 year	220 €
Diagnostic hysteroscopy procedure in the operating room without general anesthesia, operation without biopsy, observation during post-operation rest does not include: general anaesthesia	500 €
Surgical hysteroscopy procedure in the operating room without general anesthesia, biopsy according to the surgeon's indication, observation during post-operation rest does not include: general anaesthesia	650 €
histological examination of biopsied material	according to the specialised laboratory price list
Cyst puncture	250 €

vaginal cyst puncture without general anaesthesia in the operating room, observation during post operation rest <u>does not include:</u> histological examination of the punctured material	
<u>Endometrial scratch</u> endometrial disruption performed with a sterile pipelle or probe prior to embryo transfer	160 €
<u>Cervical dilatation</u> procedure under general anaesthesia, when the cervix is sterile dilated, observation during post – operation rest <u>does not include:</u> general anaesthesia	160 €
<u>Preoperative examination</u> patients are sent to a cooperating workplace or the possibly may arrange the examination by their own general practitioner	according to the cooperating workplace price list
<u>Urological examination</u> patients are sent to Urovize Clinic	according to the cooperating workplace price list
<u>General anaesthesia</u> (if not included in the therapy package) anaesthesia, the assistance of Department of Anaesthesiology and Resuscitation doctor, observation during post-operation rest	230 €
<u>Entonox (Nitrous oxide)</u> Flat rate payment per one procedure	30 €
<u>BeReady</u> an advanced method of uterine lining examination to determine the individual implantation window	520€
<u>Reprognostics</u> an advanced method of uterine lining examination to rule out the immunological cause of infertility	720€
<u>A comprehensive examination of endometrial receptivity (EndomeTRIO)</u> Consultation and preparation plan for examination, endometrial biopsy without anaesthesia, examination of biopsied material to determine the appropriate time of progesterone and other parameters during embryo transfer, interpretation of the result	1300 €
in case of necessary repeat of examination, according to the company examining the biopsy price list	

Laboratory examination	PRICE
Necessary hormonal tests package (AMH, fT4, TSH, PRL, P4)	80 €
AMH	30 €
TSH, fT4, aTPO, PRL, E2, P4, FSH, LH, hCG – per individual test	15 €
Blood group + Rh factor	20 €
vit. D	100 €
STD anti-HIV 1, 2, p24, HBsAg, anti-HBC, TPHA, RRR	100 €
Confirmation of STD results in case of positive STD examination and the need for confirmation in the National Reference Laboratory (according to valid legislation)	80–220 €
Preoperative blood examination blood count, liver and kidney functions, basic coagulation, ions	30 €
STI PCR DNA test Neisseria gonorrhoeae, Mycoplasma, Ureaplasma, Chlamydie trachomatis, Trichomonas	90 €

Genetic consultation and examination	PRICE
Genetic consultation initial consultation with a geneticist, anamnesis, examined parameters conclusion	220 €
Interpretation of genetic results and report	70 €
Karyotype blood test of a set of chromosomes	280 €
CFTR blood test of a set of cystic fibrosis gene mutations	350 €
Thrombophilic mutations f. II and f.V blood test for Leiden and Protrombin mutation genes	90 €
Panda/ Carrier test genetic compatibility test of partners – detection of monogenic diseases	490 €/ per person
PGT-A prolonged cultivation in the Embryoscope+ time-lapse system, 24 chromosomes examination from cells biopsied from developing blastocysts by the NGS method, excluding biopsy	390 €/ per embryo
PGT-SR prolonged cultivation in the Embryoscope+ time-lapse system, cells examination biopsied from developing blastocysts in known familial chromosome aberration- translocation, excluding biopsy	490 €/ per embryo
PGT-M prolonged cultivation in the Embryoscope+ time-lapse system, cells examination biopsied from developing blastocysts in a known monogenic disease – karyomapping method, excluding biopsy	4390 € /up to 5 embryos
each additional embryo to PGT-M	620 €
Biopsy (1-4 embryos)	550 €

Additional biopsy fee (5-8 embryos)	300 €
other specific genetic tests according to the geneticist indication	according to the cooperating workplace price list

Gynaecology	PRICE
--------------------	--------------

Cervical oncocytology	
Standard	50 €
LBC (liquid based cytology)	50 €
HPV genotyping	90 €

Transport	PRICE
------------------	--------------

Transport to FertilityPort Prague administration fee for transport arrangements and genetic cells transport from another facility in Prague, incl. annual storage	130 €
transport outside Prague within the Czech Republic, and from countries outside the Czech Republic	individual
Transport from FertilityPort Prague administration fee for transport arrangements of embryos / sperm / oocytes to another tissue facility	150 €

Other	PRICE
--------------	--------------

Medical records summary patient's medical file summary within 30 days in Czech language	25 €
patient's medical file summary including laboratory results* within 30 days, in foreign language (English, German or Italian) *some results may be provided in Czech language only	100 €
medical documentation copies (per A4 page)	1 €
Assigned coordinator consultation (20 min) The necessity to use a coordinator during sterility treatment beyond the consultations already used	25 €

PAYMENT AND CANCELLATION POLICY

Therapy/ procedure	Deposit before treatment start / reservation of gamete confirmation *	Surcharge/deposit* prior to egg collection	Surcharge on the day of embryo transfer
Dual-Stim protokol	1000 €	3500 €	x
Social freezing	1000 €	690 €	x
<u>Social freezing during Dual-Stimulation</u>	1000 €	1800 €	x
NeoLife	1000 €	1790 €	x
NeoLife+	1000 €	2490 €	x
GratefulLife Basic	4000 €*	790 €	
GratefulLife	4000 €*	1980 €	x
GratefulLife+	4000 €*	3980 €	x
Therapy with one donated embryo	1000 €*	X	990 €
Therapy with two donated embryos	1000 €*	x	
Embryos cryopreservation	X	250 €	according to the price list and the final number of embryos for cryopreservation

Preimplantation genetic examination	Deposit prior to egg collection	Surcharge after egg collection before sending the biopsy for examination
PGT-A	390 €	
PGT-SR	490 €	according to the price list and the final number of biopsied embryos
PGT-M	4390 €	

The deposit paid before the start of the treatment / upon gamete reservation confirmation is non-refundable. Discontinuation of treatment for reasons on the part of clients is assessed individually with regard to the client's health condition and therapy undergoing. In the event of such a treatment interruption when the FertilityPort Prague physician ("FPP") assesses its validity, the FPP costs already incurred are covered by the received deposit. In therapies with donated oocytes, when treatment is discontinued by FPP due to the donor's serious health complications, FPP has reserved the right to offer a new donor to clients. In the case of therapies with donated embryos, if the treatment is postponed by clients for a period longer than six months since deposit payment, the reservation can be extended after payment of storage of embryos in the cryostorage according to the valid FPP price list.

The donor's reservation is valid for three months since the deposit payment.

The price of the therapy is guaranteed for a period of three months since the deposit payment.

By paying the deposit according to this price list, the client agrees with the FPP price list and payment and cancellation policy.
