

PRICE LIST

valid from 1.6.2025

Initial consultation and examination	PRICE
Initial online consultation anamnesis and evaluation of provided results, explanation of sterility treatment options in the length of 30 min	FREE
Initial personal consultation (entrance examination price will be deducted from the therapy cost) consultation with a doctor, anamnesis, basic gynaecological examination including ultrasound scan, plan of necessary examinations and explanation of sterility treatment options <u>does not include:</u> cervix examination (oncocytology), blood samples, sperm analysis	150 €
HyCoSy – Fallopian tube patency examination outpatient examination of fallopian tube patency using ultrasound and contrast medium	150€
Ultrasound scan examination (if not included within therapy package) gynaecological ultrasound scan examination, further treatment plan, report	80 €
Sperm analysis (if not included within therapy package) basic examination according to WHO recommendations	80 €
Personal consultation with a doctor upon request consultation without gynaecological or laboratory examination in the length of 15 min	50 €
Online consultation with a doctor (telephone / Skype / MS Teams) upon request consultation and treatment recommendations based on additional results in the length of 15 mins	40 €

THERAPY USING OWN GENETIC CELLS

Intrauterine Insemination (IUI)	PRICE
IUI AIH (with partner's sperm) <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan all ultrasound examinations during therapy intrauterine insemination with partner's sperm <u>does not include:</u> medication	590 €
IUI AID (with donor sperm) <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan all ultrasound examinations during therapy intrauterine insemination with donor sperm <u>does not include:</u> medication	1090 €

Natural cycle	PRICE
<u>Natural Cycle – Complete</u> <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan all ultrasound examinations during stimulation STD of a couple according to the valid legislation sperm analysis (SPG) and its preparation oocyte(s) retrieval without general anaesthesia fertilization of 2 mature oocytes by ICSI method ECHO catheter during transfer 1. embryo transfer* <p>does not include: medication, embryo(s) cryopreservation</p>	1600 €
<u>in case of cycle resulting without embryo transfer</u> includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)	1250 €
<u>in case of cycle termination after oocyte(s) retrieval</u> includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize	1000 €
<u>in case of cycle termination before the oocyte(s) retrieval</u> no response to stimulant medication	750 €

*embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

Mild Stimulation	PRICE
<u>Mild Stimulation – complete</u> <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan all ultrasound scan examinations during stimulation STD of a couple according to the valid legislation sperm analysis (SPG) and its preparation oocyte(s) retrieval without general anaesthesia fertilization of all mature oocytes by ICSI method ECHO catheter during transfer 1. embryo transfer* <p>does not include: medication, embryo(s) cryopreservation</p>	1990 €
<u>in case of cycle resulting without embryo transfer</u> includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer*(does not apply to aneuploidies in PGT embryos)	1350 €
<u>in case of cycle termination after oocyte(s) retrieval</u> includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize	1000 €
<u>in case of cycle termination before the oocyte(s) retrieval</u> no response to stimulant medication	750 €

*embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

IVF packages using your own genetic cells	PRICE
NeoLife <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan all ultrasound scan examinations during stimulation STD of a couple according to the valid legislation sperm analysis (SPG) and its preparation oocyte(s) retrieval under general anaesthesia fertilization of all oocytes prolonged cultivation ECHO catheter during transfer 1. embryo transfer* assisted hatching by laser <p>does not include: medication, embryo(s) cryopreservation</p>	2790 €
in case of cycle resulting without embryo transfer includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)	2200 €
in case of cycle termination after oocyte(s) retrieval includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize	1790 €
in case of cycle termination before the oocyte(s) retrieval no response to stimulant medication	1000 €

*embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

NeoLife+ includes all listed from the NeoLife package above and furthermore: <ul style="list-style-type: none"> use of the Microfluid sperm sorting chips for sperm pre-selection a dividing spindle visualization with a polarizing microscope during fertilization of all mature oocytes by the ICSI method prolonged cultivation in the Embryoscope+ time-lapse system 1. embryo transfer* <p>does not include: medication, embryo(s) cryopreservation</p>	3490 €
in case of cycle resulting without embryo transfer includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)	2900 €
in case of cycle termination after oocyte(s) retrieval includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize	1790 €
in case of cycle termination before the oocyte(s) retrieval no response to stimulant medication	1000 €

*embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

Dual-stim therapy	PRICE
Dual-stim therapy <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan all ultrasound examinations during stimulations STD of a couple according to the valid legislation sperm analysis (SPG) and its preparation both oocyte retrievals under general anaesthesia a dividing spindle visualization with a polarizing microscope during fertilization of all mature oocytes by ICSI method prolonged cultivation ECHO catheter during transfer 1. embryotransfer* assisted hatching by laser <p>does not include: medication, embryo(s) cryopreservation</p>	4500 €
in case of cycle resulting without embryo transfer includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)	4050 €
in case of cycle termination after the second oocyte(s) retrieval includes all operations from above to the second oocyte(s) collection incl. but there is no mature egg for fertilization	3600 €
in case of cycle termination before the second oocyte(s) retrieval no response to stimulant medication	2900 €
in case of cycle termination after the first oocyte(s) retrieval includes all procedures above to the oocyte(s) collection incl., but there is no mature egg to fertilize	1790 €
in case of cycle termination before the first oocyte(s) retrieval no response to stimulant medication	1000 €

*embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

Surrogacy treatment	upon request
----------------------------	--------------

Oocytes cryopreservation (social freezing)	PRICE
Social freezing <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan necessary hormonal tests, including AMH STD according to the valid legislation all ultrasound scan examinations during stimulation oocyte(s) retrieval under general anaesthesia cryopreservation of all mature oocytes (2-3 oocytes in 1 straw) 1 year storage <u>does not include:</u> medication	1790 €
in case there are no oocytes for cryopreservation	1400 €
in case of cycle termination before the oocyte(s) retrieval	1000 €
Social freezing during Dual-Stimulation <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan necessary hormonal tests, including AMH STD according to the valid legislation all ultrasound scan examinations during stimulation oocyte(s) retrieval under general anaesthesia new stimulation after first oocyte(s) retrieval in following 4-5 days cryopreservation of all mature oocytes (2-3 oocytes in 1 straw) 1 year storage <u>does not include:</u> medication	2900 €
in case there are no oocytes for cryopreservation after the second oocyte(s) retrieval	2490 €
in case of cycle termination before the second oocyte(s) retrieval (i.e. includes all procedures above to the first oocyte(s) collection incl., but there is no reaction to stimulant medication)	1900 €
Completion of the cycle after social freezing <ul style="list-style-type: none"> consultation with a couple and embryo transfer preparation plan necessary hormonal tests for a female patient STD of male partner according to the valid legislation sperm analysis (SPG) for a male partner ultrasound scan examination during therapy preparation oocytes thawing process oocytes fertilization by ICSI method prolonged cultivation in the Embryoscope+ time-lapse system assisted hatching by laser ECHO catheter during transfer 1. embryo transfer* <u>does not include:</u> medication, embryo(s) cryopreservation	1490 €

in case of cycle resulting without embryo transfer includes all procedures above to the embryo transfer, but there is no suitable embryo to transfer *(does not apply to aneuploidies in PGT embryos)	1050 €
in case of cycle termination without oocytes for fertilization includes all procedures above but there is no egg to be fertilized	1000 €

*embryo transfer guarantee does not apply in case of aneuploid embryos after PGT

Sperm cryopreservation	PRICE
------------------------	-------

Sperm cryopreservation (if not included within therapy package) sperm freezing (1-3 straws) including 1-year storage and STD according to the valid legislation	250 €
--	--------------

Embryo cryopreservation	PRICE
-------------------------	-------

Embryo cryopreservation cryopreservation of suitable embryos by vitrification, always 1 embryo in 1 straw, including 1-year storage	
1 straw	250 €
2 and more straws (flat-rate payment)	500 €

Cryo-embryo transfer	PRICE
----------------------	-------

Cryo-embryo transfer <ul style="list-style-type: none"> coordinator availability during therapy preparation of the treatment plan all ultrasound scan examinations during therapy preparation embryo thawing process assisted hatching by laser ECHO catheter during transfer embryo transfer <u>does not include:</u> medication	950 €
---	--------------

in the case of procedure performance on weekends or holidays, at the patient's request, a surcharge of 800€ applies in addition to the therapy cost

THERAPY USING DONATED GENETIC CELLS

IVF packages using donated genetic cells	PRICE
<p>Grateful Life Basic</p> <ul style="list-style-type: none"> coordinator availability during therapy preparation and consultation of the treatment plan STD of male partner according to the valid legislation Sperm analysis (SPG) and its preparation male partner sperm cryopreservation for donated oocytes fertilisation necessary hormonal tests of the female recipient blood group examination of both partners ultrasound scan examinations of the female recipient during embryo transfer preparation donor compensation (donor selection according to recipient's phenotype and blood groups upon request) fertilization of all mature oocytes by ICSI method (cryopreserved oocytes may be used) prolonged cultivation cryopreservation of suitable embryos in the blastocyst stage including 1 year storage ECHO catheter during embryo transfer 1. embryo transfer* guarantee of 1 good quality blastocyst** <p><u>does not include:</u> medication</p>	4980 €
<p>Grateful Life</p> <p>includes all listed from the Grateful Life Basic package above and furthermore:</p> <ul style="list-style-type: none"> fertilization of all mature oocytes by ICSI method (fresh oocytes only) assisted hatching by laser guarantee of 2 good quality blastocysts** 3rd cycle free of charge*** <p><u>does not include:</u> medication</p>	5980 €
<p>Grateful Life+</p> <p>includes all listed from the Grateful Life package above and furthermore:</p> <ul style="list-style-type: none"> prolonged cultivation in the Embryoscope+ time-lapse system guarantee of 3 good quality blastocysts** (instead guarantee of two blastocysts according to the Grateful Life package) 3rd cycle free of charge*** <p><u>does not include:</u> medication</p>	7980 €

** blastocyst(s) guarantee does not apply in the case of grossly pathological sperm analysis and aneuploid embryos after PGT, the total blastocyst guarantee is fulfilled after the transfer of all existing embryos

*****3rd cycle free of charge**

When completing two Grateful Life or Grateful Life+ therapies, we offer our patients a Grateful Life Basic package free of charge, if the following conditions are met:

- the patient does not violate the treatment plan during therapy (medication use, documentation evidence of required results),
- sperm analysis within the norm (the highest minor pathology),
- there is no recurrent low endometrium during embryo transfer preparation even at elevated doses of oestrogens,
- a pathology was not known before the treatment, which was pointed out by the centre's doctor and the patient rejected the proposed procedure (for cases of sactosalping, SM fibroids, etc.),

Uterine pregnancy has never been achieved with a fetal heartbeat confirmation.

IVF package using donated embryos

PRICE

Therapy with one donated embryo

- coordinator availability during therapy
- preparation and consultation of the treatment plan
- necessary hormonal tests of the female recipient
- ultrasound scan examinations of the female recipient during embryo transfer preparation
- of one donated embryo from a cryo-bank (embryo from donated oocytes and donated sperm in the blastocyst stage, both donors examined according to currently valid legislation of gamete donors)
- **ECHO catheter** during embryo transfer
- **1. embryo transfer***
- **assisted hatching** by laser

does not include: medication

1990 €

in the case of procedure performance on weekends or holidays, at the patient's request, a surcharge of 800€ applies in addition to the therapy cost

INDIVIDUAL METHODS AND ADDITIONAL SERVICES

Methods maximising therapy success (if not included in the therapy package price)	PRICE
---	-------

ICSI method of all mature oocytes	450 €
Microfluid sperm sorting chips	350 €
Dividing spindle observation system	350 €
Prolonged cultivation	250 €
Prolonged cultivation in the Embryoscope+ time-lapse system	450 €
Assisted hatching by laser	250 €
ECHO catheter	150 €
EmbryoGlue	230 €

Additional services and other examinations	PRICE
--	-------

<u>Donated sperm</u> thawing of 1 dose of donor sperm and its preparation for therapy (selection respecting the couple phenotype)	500 €
<u>Annual storage of gametes</u> extension of embryos / oocytes / sperm / testicular or epididymal tissue storage by 1 year	150 €
<u>TESE/MESA/PESA</u> testis/epididymis tissue collection under general anaesthesia, sperm preparation, observation during post-operation rest	1700 €
in case of sperm retrieval, replenishment of the patient's STD according to the valid legislation, cryopreservation of the genetic material, its storage for 1 year	220 €
<u>Surgical hysteroscopy</u> procedure in the operating room without general anaesthesia, biopsy according to the surgeon's indication, observation during post-operation rest <u>does not include:</u> general anaesthesia	650 €
<u>histological examination of biopsied material</u>	according to the specialised laboratory price list
<u>Cyst puncture</u> vaginal cyst puncture without general anaesthesia in the operating room, observation during post operation rest <u>does not include:</u> histological examination of the punctured material	250 €
<u>Endometrial scratch</u> endometrial disruption performed with a sterile pipelle or probe prior to embryo transfer	160 €

<u>Cervical dilatation</u> procedure under general anaesthesia, when the cervix is sterile dilated, observation during post – operation rest <u>does not include: general anaesthesia</u>	160 €
<u>Preoperative examination</u> patients are sent to a cooperating workplace or the possibly may arrange the examination by their own general practitioner	according to the cooperating workplace price list
<u>Urological examination</u> patients are sent to Urovize Clinic	according to the cooperating workplace price list
<u>General anaesthesia</u> (if not included in the therapy package) anaesthesia, the assistance of Department of Anaesthesiology and Resuscitation doctor, observation during post-operation rest	230 €
<u>Entonox (Nitrous oxide)</u> Flat rate payment per one procedure	30 €
<u>BeReady</u> an advanced method of uterine lining examination to determine the individual implantation window	560€
<u>Reprognostics</u> an advanced method of uterine lining examination to rule out the immunological cause of infertility (4 markers)	720€
in case of necessary repeat of examination, according to the company examining the biopsy price list	

Laboratory examination	PRICE
Necessary hormonal tests package for IVF (AMH, fT4, TSH, aTPO, PRL)	95 €
Necessary hormonal tests package for KET (fT4, TSH, aTPO, PRL, 2x P4)	65 €
AMH	40 €
TSH, fT4, PRL, E2, P4, FSH, LH, hCG – per individual test	15 €
aTPO	25 €
Blood group + Rh factor	25 €
vit. D	50 €
<u>STD</u> HIV, Syphilis, Hepatitis B, Hepatitis C	100 €
<u>Confirmation of STD results</u> in case of positive STD examination and the need for confirmation in the National Reference Laboratory (according to valid legislation)	80–220 €
<u>Preoperative blood examination</u> blood count, liver and kidney functions, basic coagulation, ions	30 €
<u>STI 7</u> Neisseria gonorrhoeae, Mycoplasma hominis, Mycoplasma genitalium, Ureaplasma, sp.- parvum/ urealyticum, Chlamydie trachomatis, Trichomonas vaginalis	250 €

Genetic consultation and examination	PRICE
Genetic consultation initial consultation with a geneticist, anamnesis, examined parameters conclusion	220 €
Interpretation of genetic results and report	70 €
Karyotype blood test of a set of chromosomes	280 €
CFTR blood test of a set of cystic fibrosis gene mutations	350 €
Thrombophilic mutations f. II and f.V blood test for Leiden and Prothrombin mutation genes	90 €
PANDA Basic basic genetic screening offered as part of preconception diagnostic services	450 €/ per person
PANDA Carrier genetic screening for the identification of hidden (recessive) gene mutations in couples	650 €/ per person
PGT-A prolonged cultivation in the Embryoscope+ time-lapse system, 24 chromosomes examination from cells biopsied from developing blastocysts by the NGS method, excluding biopsy within one cycle	390 €/ per embryo
PGT-SR prolonged cultivation in the Embryoscope+ time-lapse system, cells examination biopsied from developing blastocysts in known familial chromosome aberration- translocation, excluding biopsy within one cycle	490 €/ per embryo
PGT-M prolonged cultivation in the Embryoscope+ time-lapse system, cells examination biopsied from developing blastocysts in a known monogenic disease – karyomapping method, excluding biopsy within one cycle	4390 €/ up to 5 embryos
each additional embryo to PGT-M within one cycle	620 €
Biopsy (1-4 embryos) within one cycle	550 €
Additional biopsy fee (5-8 embryos) within one cycle	300 €
other specific genetic tests according to the geneticist indication	according to the cooperating workplace price list

Gynaecology	PRICE
-------------	-------

<u>Cervical oncocytology</u>	
LBC (liquid-based cytology)	70 €
HPV genotyping	90 €
<u>Initial comprehensive prenatal examination</u>	70 €
<u>Each additional prenatal examination</u>	50 €
<u>Panorama test – Prenatal screening examination</u>	
Basic panel	550 €
Basic panel + DiGeorge syndrome (22q11.2 deletion)	620 €
Extended panel (microdeletions)	700 €
<u>Sanakin autologous serum</u>	420 €

Transport	PRICE
-----------	-------

<u>Transport to FertilityPort Prague</u> administration fee for transport arrangements and genetic cells transport from another facility in Prague, incl. annual storage	130 €
transport outside Prague within the Czech Republic, and from countries outside the Czech Republic	individual
<u>Administrative arrangement of transport from FertilityPort Prague</u> administration fee for transport arrangements of embryos / sperm / oocytes to another tissue facility	150 €

Other	PRICE
-------	-------

<u>Medical records summary</u> patient's medical file summary within 30 days in Czech language	25 €
patient's medical file summary including laboratory results* within 30 days, in foreign language (English, German or Italian) *some results may be provided in Czech language only	100 €
medical documentation copies (per A4 page)	1 €
<u>Procedure performed by a nurse</u> injection administration and blood collection – for purposes other than treatment at FertilityPort Prague	15 €
<u>Assigned coordinator consultation</u> (20 min) The necessity to use a coordinator during sterility treatment beyond the consultations already used	25 €

PAYMENT AND CANCELLATION POLICY

Therapy/ procedure	Deposit before treatment start / reservation of gamete confirmation *	Surcharge/deposit* prior to egg collection	Surcharge on the day of embryo transfer
Natural Cycle	1000 €	600 €	x
Mild Stimulation	1000 €	990 €	x
Dual-Stim protocol	1000 €	3500 €	x
Social freezing	1000 €	790 €	x
Social freezing during Dual-Stimulation	1000 €	1900 €	x
NeoLife	1000 €	1790 €	x
NeoLife+	1000 €	2490 €	x
GratefulLife Basic	4000 €*	790 €	
GratefulLife	4000 €*	1980 €	x
GratefulLife+	4000 €*	3980 €	x
Therapy with one donated embryo	1000 €*	X	990 €
Embryos cryopreservation	X	250 €	according to the price list and the final number of embryos for cryopreservation

Preimplantation genetic examination	Deposit prior to egg collection	Surcharge after egg collection before sending the biopsy for examination
PGT-A	390 €	
PGT-SR	490 €	according to the price list and the final number of biopsied embryos
PGT-M	4390 €	

The deposit paid before the start of the treatment / upon gamete reservation confirmation is non-refundable. Discontinuation of treatment for reasons on the part of clients is assessed individually with regard to the client's health condition and therapy undergoing. In the event of such a treatment interruption when the FertilityPort Prague physician ("FPP") assesses its validity, the FPP costs already incurred are covered by the received deposit. In therapies with donated oocytes, when treatment is discontinued by FPP due to the donor's serious health complications, FPP has reserved the right to offer a new donor to clients. In the case of therapies with donated embryos, if the treatment is postponed by clients for a period longer than six months since deposit payment, the reservation can be extended after payment of storage of embryos in the cryostorage according to the valid FPP price list.

The donor's reservation is valid for three months the longest since the deposit payment.

The price of the therapy is guaranteed for a period of three months since the deposit payment.

By paying the deposit according to this price list, the client agrees with the FPP price list incl. its changes, and payment and cancellation policy.
